B HOW TO COMPARE 2-DIGIT NUMBERS

B.1 COMPARING NUMBERS

Ex 11:

$21 > 13$

Answer:

- Since 2 is in the tens place of 21 and is greater than 1 in the tens place of 13, 21 is greater than 13.

Ex 12:

$36 < 52$

Answer:

- Since 3 is in the tens place of 36 and is less than 5 in the tens place of 52, 36 is less than 52.

$36 < 52$

Ex 13:

$88 > 26$

Answer:

- Since 8 is in the tens place of 88 and is greater than 2 in the tens place of 26, 88 is greater than 26.

Ex 14:

$5 < 22$

Answer:

- Since 0 is in the tens place of 05 and is less than 2 in the tens place of 22, 5 is less than 22.

Ex 15:

$68 > 62$

Answer:

- Since 6 is in the tens place for both numbers, we compare the ones place. 8 in the ones place of 68 is greater than 2 in the ones place of 62, so 68 is greater than 62.

Ex 16:

$90 > 61$

Answer:

- Since 9 is in the tens place of 90 and is greater than 6 in the tens place of 61, 90 is greater than 61.

- $90 > 61$

**Ex 17:**

$$43 \square 48$$

*Answer:*

- The digits in the tens place are the same (4), so we look at the ones place. Since 3 in the ones place of 43 is less than 8 in the ones place of 48, 43 is less than 48.

- $43 < 48$

**Ex 18:**

$$35 \square 35$$

*Answer:*

- Since both the tens and ones places are the same in 35 and 35, the two numbers are equal.

- $35 = 35$

## B.2 ORDERING NUMBERS
