RATIO

A RATIO

> **Definition Ratio**
>
> A **ratio** is a comparison of two quantities. The ratio 2 to 3 can be expressed as the fraction $\dfrac{2}{3}$.

Ex:

The fraction of red apples to all the apples is $\dfrac{3}{4}$.

B EQUIVALENT RATIOS

> **Method Simplifying Ratios**
>
> The fraction of red apples to all apples is $\dfrac{2}{4}$, which simplifies to $\dfrac{1}{2}$ (half are red).
