ROUNDING

A ROUNDING

> **Method Rounding Numbers to a Place Value**
>
> 1. Find the digit in the place you are rounding to.
>
> 2. Look at the digit to the right of it.
>
> 3. If this digit is 5 or more, add 1 to the digit in the place you are rounding to (**round up**).
>
> 4. If this digit is 4 or less, keep the digit the same (**round down**).
>
> 5. Replace all digits to the right with zeros.

Ex: Round the number 365 to the nearest hundred.

Answer:

3̲65   Find the digit in the hundreds place: 3

36̲5   Look at the digit to the right: 6

Since 6 is greater than 5, round up by adding 1: $3 + 1 = 4$

400   Replace all digits to the right with zeros.

The rounded number is 400.
